

Symposium on **Forensic Audit & Cyber Security** in Corporate World

Focus on: Insights and Digital Investigation

31st May 2017 at 1:00 PM at PHD House, New Delhi

The infectiousness of Corporate Scam is contagious, unless curbed wisely.

Cyber security in India has come a long way in the past few years and has gained huge importance in recent times with the thrust on Digital India initiative. With rapidly growing interconnected business operations and increasing digitization, cyber security challenges are bound to intensify. Increasingly, cyber security is becoming a top-of-mind issue for most CEOs and boards, and they are becoming more pre-emptive in evaluating cyber security risk exposure as an enterprise-wide risk management.

However the forensic auditing has not got its due recognition even after alarming increase in the multifarious financial crimes due to the lack of adequately trained professionals to investigate and report on the complex financial crimes. Use of forensic technology to monitor and testing of compliance can create a cycle of improved adherence with company policy and improved fraud prevention and detection, while providing additional comfort to key stakeholders as well.

For strengthening the capabilities in forensic audit, understanding use of forensic tools and building cyber security & digital forensic investigation skills, **Corporate Affairs Committee of PHD Chamber of Commerce and Industry is organizing a Symposium on "Forensic Audit & Cyber Security in Corporate World - Focus on: Insights and Digital Investigation" on 31st May 2017 at 1:00 PM at PHD House, 4/2 Siri Institutional Area, August Kranti Marg, New Delhi.**
